Zirconium Containing Ceramic Fiber Paper

1,Description of Zirconium Containing Ceramic Fiber Paper:

The production process of ceramic fiber paper with ZrO_2 powder is the same as that of high-alumina ceramic fiber paper. However, the strength, toughness and working temperature of the product are higher than those of high-alumina ceramic fiber paper product, and the working temperature of the product reaches $1400^{\circ}C$. Zirconium Containing Ceramic Fiber Paper has low heat capacity, low thermal conductivity, excellent flexibility, tear resistance, excellent electrical insulation and heat insulation performance, excellent mechanical processing performance, the product has been widely used in industrial insulation, sealing, heat insulation and other aspects.
